

V6

Fiberglass insulated double sided ladder

Double sided stepladder with 80mm-flat steps on both sides and "C" frames (82 x 30 mm). This model has been studied for a very professional and heavy duty use but is suitable also for DIY in case it is needed to work closed to electricity cables.

Steps are reinforced through aluminium reinforcing bands which are riveted to ladder profiles and grant robustness and strength to ladder structure. The product complies to European Standard En131.

**Dielectric test executed
and insulation 100.000 Volts**

TECHNICAL FEATURES

- Enlarged rubber feet made of anti-slip PVC
- Anti opening and closing device in galvanized steel
- Reinforcements under the steps
- Distance between steps 25 cm
- Packaging in shrink foils with poster

**Guarantee
5 years**
