

EZ LOADER

EZ Loaders are true ergonomic tools in every sense of the word. They are designed to eliminate worker bending by automatically raising and lowering pallets during loading or unloading without the use of mechanical springs. EZ Loaders also allow easy pallet rotation so the user does not have to reach or strain. As the load weight changes, the EZ Loader automatically adjusts, keeping the top of the load at a convenient working height. The patented pneumatic operating system found only in the EZ Loader has proven to be the top choice of industry professionals worldwide.

Technical Features:

- Self-levelling design automatically keeps the top of the load at a convenient working height to help eliminate bending and improve productivity.
- Integral rotator ring helps eliminate reaching and stretching.
- Captive air operation eliminates cumbersome mechanical springs and gives more controlled (dampened) movement to the platform.
- Infinitely adjustable for varied loads by simply adding or bleeding air – no difficult changing of springs required.
- Pressure gauge and air valves are protected, yet located for easy access.
- Secured ball-bearing centre pivot of the rotator ring provides smooth, even rotation.
- Pressure relief valve prevents excess pressure build-up.
- Heavy-duty structural steel construction to handle tough industrial environments
- Surfaces are phosphated and powder coated for a lasting, durable finish.
- Safety finger guards under the rotator ring are fitted as standard
- Easily transportable within the workplace by fork lift truck
- CE marked

Technical Specification:

Model	Travel	Minimum Capacity	Maximum Capacity	Raised Height (C)	Closed Height (B)	Rotator Ring Dia (A)	Base Length (D)	Base Width (E)	Ship Weight
EZ-30	539	204 kg	1363 kg	762	223	1093	1283	762	227 kg
EZ-45	539	1350 kg	2040 kg	762	223	1093	1283	762	239 kg

All dimensions are in mm unless otherwise shown
